Sketch of course & obstacles:

European Cable
Wakeboard Tour
2008

1. – 2. August 2008
in Marburg/ Niederweimar, Germany

Course

The Cable in Marburg is a Rixen system built in 1999, about 580 m long. We'll have a course with nine obstacles -. In the moment it starts with a Funbox on the right side and a small Table on the left side, followed by a slider on the right side and a kicker on the left. There is still enough space to do an inverted trick before the first corner inside or outside. Between the first corner and the driving tower (about 65m) there are no obstacles, you are able to do a fast invert on the left or an big one on the right or even one small one inside and then one fast small one outside. About 50m after the driving tower there is a small new Kicker on the right. It will be possible to do a fast invert inside and than a trick over the kicker. After the Kicker there is the worldwide first swimming curved wallride slider on the left and a brandnew Schöller Ice Funbox on the right. You will be able to do an big invert trick inside or outside after the engine tower and ride one of it. The course ends with a new Table on the left and with the blue Kicker on the right. You will able to reach one of these obstacles after you ride the curved slider or the funbox.
