Course

The Cable in Marburg is a Rixen system built in 1999, about 580 m long. We'll have a course with in the moment seven obstacles - In the next two month we will get perhaps one more Kicker and one more Table. In the moment it starts with a Funbox on the right side, followed by a slider on the left side, still enough space to do an inverted trick before the first corner, between the first corner and the driving tower (about 65m) there are no obstacles, you are able to do a fast invert on the left or an big one on the right. About 80m after the driving tower there will be the new and worldwide first swimming curved wallride slider on the left and a brandnew Funbox on the right. You will be able to do an short invert trick inside or outside you ride one of it; the course ends with a kicker on the left and a or a 16 meters long, 50cm high and 50 cm wide table or kicker at the right. You will able to reach one of these obstacles after you ride the curved slider or the funbox.
