Course

The Cable Neubrandenburg is a 5 tower Se Si Tec system built in 2000, about 845 m long. We'll have a course with five obstacles - it starts with a straight slider on the left side, then you have enough space to do your inverted trick before the first corner, between the first corner and the driving tower (about 60m) there are no obstacles, you are able to do a fast invert on the left or an big one on the right. About 60 m after the driving tower there will be wave Kicker at right and the dragon slider on the left. You will be able to do an short turn before you can hit the Fun Box on the right ; the course ends with a kicker on the left

Sketch of course & obstacles:
