	4	Semi-Finals	2	6	6	2	Results	step-ladder	yes	yes
	5	Finals	1	6		2	Results	ladder		yes

* To simplify the structure in this round, instead of using both the step-ladder and ladder systems, we will use only the step-ladder system.

Please note that to access 'scorenow' and produce the start lists for the competition you need internet access. In the event of internet access failure, you can ask another scorer to help produce these remotely.

START LISTS AND RUNNING ORDER

Whilst the IWWF Scoring System (SCORE NOW) will automatically generate the Start lists and running order for the events, it is essential that the Scorer and Chief Judge at the event understand the principle for creating in the event of a systems failure during the event.

As per the Rule Book, disagreements with the system generated start lists and running orders is no grounds for a protest and will not delay the running of a competition.

There are 3 systems used to create the Starting lists.

Round 1 - Results

Snake System

Placement	Group A	Group B	Group C
1	Athlete 1	Athlete 2	Athlete 3
2	Athlete 4	Athlete 5	Athlete 6
3	Athlete 7	Athlete 8	Athlete 9
4	Athlete 10	Athlete 11	Athlete 12
5	Athlete 13	Athlete 14	Athlete 15
6	Athlete 16	Athlete 17	Athlete 18

Ladder System

Placement	Group A	Group B	Group C
1	Athlete 1	Athlete 2	Athlete 3
2	Athlete 4	Athlete 5	Athlete 6
3	Athlete 7	Athlete 8	Athlete 9
4	Athlete 10	Athlete 11	Athlete 12
5	Athlete 13	Athlete 14	Athlete 15
6	Athlete 16	Athlete 17	Athlete 18

Stepladder System (AAL)

Placement	Group A	Group B	Group C
1	Athlete 1	Athlete 2	Athlete 3
2	Athlete 4	Athlete 5	Athlete 6
3	Athlete 7	Athlete 8	Athlete 9
4	Athlete 10	Athlete 11	Athlete 12
5	Athlete 13	Athlete 14	Athlete 15
6	Athlete 16	Athlete 17	Athlete 18

Round 2 - Startlists

Startingorder	Group A
1	Athlete 7
2	Athlete 8
3	Athlete 9
4	Athlete 6
5	Athlete 5
6	Athlete 4
7	Athlete 1
8	Athlete 2
9	Athlete 3

Startingorder	Group A
1	Athlete 7
2	Athlete 8
3	Athlete 9
4	Athlete 4
5	Athlete 5
6	Athlete 6
7	Athlete 1
8	Athlete 2
9	Athlete 3

Startingorder	Group A
1	Athlete 8
2	Athlete 9
3	Athlete 7
4	Athlete 6
5	Athlete 4
6	Athlete 5
7	Athlete 1
8	Athlete 2
9	Athlete 3

Will be used for all Qualification startlists

Will be used for all x -> 1 group options, mainly finals.

Will be used for all MOD2 group options, mainly LCQ, Quarter and Semis.

Explanation of Heat Systems

Seeding Systems in Wakeboarding Competitions

Seeding systems are used in wakeboarding competitions to fairly distribute athletes into heats and determine the order in which they compete. The three primary systems in use are the Snake System, Ladder System, and Stepladder System (AAL). Each system serves a distinct purpose and is suited for different stages of the competition.

1. Snake System

The Snake System ensures that athletes are evenly distributed across groups to maintain competitive balance. The ranking order is applied in a “zig-zag” pattern to prevent all top-ranked riders from being in the same heat.

How it works:

- Athletes are assigned to groups in a back-and-forth manner (e.g., first in Group A, second in Group B, third in Group C, then the next cycle reverses).
- This system equalizes the strength of groups by ensuring top, mid-level, and lower-ranked riders are evenly distributed.

Usage:

- Used primarily in Qualification rounds where multiple heats are necessary.
- Ensures fair competition by spreading talent across all heats.

2. Ladder System

The Ladder System is structured in a way that rewards higher-performing athletes by placing them in an advantageous seeding order for the next round.

How it works:

- Riders are placed in groups according to their placement from the previous round.
- Higher-ranked riders from the previous round are positioned favorably to compete against others of similar ranking.
- The order of performance is reversed in subsequent rounds (e.g., lowest-ranked athlete starts first).

Usage:

- Primarily used in final rounds where only one group competes.
- Ensures that riders who performed well in the previous round are positioned better in the starting order.

3. Stepladder System (AAL)

The Stepladder System (AAL) is a progressive format where only a select number of riders advance step-by-step towards the final.

How it works:

- The lowest-seeded riders compete first.

- The winners advance to the next level, where they face higher-seeded competitors.
- This continues until the top-seeded riders enter at the final stage, giving them an advantage.
- Each stage is treated as an elimination round.

Usage:

- Typically used for Last Chance Qualifiers (LCQ), Quarter-Finals, and Semi-Finals.
- Helps create progressive elimination rounds leading up to the finals.
- Ensures that only the best-performing athletes continue through the competition.

4. When to Use Each Seeding System

The seeding system matrix defines when to use the Snake, Ladder, or Stepladder System (AAL) in different competition rounds. The exact allocation of systems depends on the round structure, which can be seen in the heatsystem table.

System	When to Use	Purpose
Snake System 	Qualification Rounds (Early Rounds)	Ensures fair distribution of riders across heats
Ladder System 	Rounds where only 1 group competes (e.g., Semi-Finals, Finals)	Rewards top athletes with better starting positions
Stepladder System 	LCQ, Quarter-Finals, Semi-Finals	Progressive elimination, ensuring only top athletes advance
